

# Evidence Case File

CASE No.

777-09

Case Description:

“Complexity =  
Intelligent Designer”

Our brains and DNA are referred to as the most complex structures in the universe. We are mechanical and instructionally “coded” (DNA similar to computer coding), which demands an intelligent designer! Planet earth is also delicately designed so we are able to survive here. Complexity comes from an intelligent designer and not “goo, dirt and wind!”
