

Evidence Case File

CASE No.

777 - 11

Case Description:

"First Cause"

Everything that exists in the world had a beginning or a "first cause." Similarly, anything in motion, such as the universe, required something to cause it to move. These concepts are collectively referred to as the Cosmological Argument. Science finally caught up with the Bible when it was confirmed in the 20th century that the universe had a beginning!
