

# Evidence Case File

CASE No.

777 - 15

Case Description:

"The Great Flood"

The Bible discusses a great flood in Genesis 6-9. Is there evidence that supports this supernatural event? In short, yes! Today's science confirms 75%-85% of the rock surface around the world is made up of sedimentary rock. This means they laid under water at one point and when the water subsided, the sediment dried, hardened, and became rock.
