

# Evidence Case File

CASE No.

777-18

Case Description:

"8<sup>th</sup> Day Circumcision"

In Genesis 17:12, God commanded Abraham to circumcise male babies on the 8<sup>th</sup> day. Interestingly, medical science has now discovered that this is the day that the coagulating factor in the blood (called prothrombin) is the highest. Specifically, it reaches its peak on the 8<sup>th</sup> day and then drops.

**NOTE:** The writings within the book of Genesis (along with the other Old Testament books) are supported by evidence from the Dead Sea Scrolls (see Case File 777-01).
