

Evidence Case File

CASE No.

777 - 17

Case Description:

"Earth's Free-Float"

The Bible speaks of the earth's free float in space long before man (or "science") discovered such. The Bible states: *"He... hangs the earth upon nothing."* (Job 26:7). Science did not discover that the earth hangs upon nothing until 1650. Although the exact date is unknown, data and science suggests the book of Job was written sometime between 700-1500 B.C., which is long before man's discovery.

NOTE: The writings within the book of Job (along with the other Old Testament books) are supported by evidence from the Dead Sea Scrolls (see Case File 777-01).
