

Evidence Case File

CASE No.

777-19

Case Description:

“Origin of Sexes”

Almost all forms of complex life (humans, dogs, horses, birds, fish, etc.) have both male and female. The male and female need one another to reproduce. The Bible tells us that *“he who created them at the beginning made them male and female”* (Matthew 19:4). From an evolution perspective, how is it possible that both a male and female with very complex and complementary reproductive systems spontaneously evolved at or near the same time?
